INTRODUCTION

We have developed a range of innovative fitness and play systems that combine fun with a powerful cardiovascular workout to produce an environment which is both stimulating and physically challenging.

Our equipment is perfect for Holiday Parks, Campsites, Farm Parks, Pubs, Hotels, Leisure Centres and Theme Parks.

Play Fitness are able to design, supply and install high quality playground equipment; as well as sports and fitness equipment, we will enhance your play space.

The provision of suitable sport and play equipment in a destination site is a great investment to keep a wide age range of visitors happily and healthily exercising. It's important that such an area is a safe environment for users of all ages to play and have fun-filled activities to keep them engaged.

Play Fitness' products are manufactured in the UK we have over 400 installations across the country. We offer exciting and challenging playground equipment and impact absorbing surfacing, as well as sports equipment and outdoor adult fitness equipment.

Our newest range the Ninja Fitness course is Play Fitness' response to the fastest growing area of outdoor recreation, challenge and obstacle racing equipment.

Play Fitness has combined technology from Parkour, Rock Climbing and Ropes Courses to create the ultimate Ninja obstacle course. Ninja Fitness is a fantastic addition to any destination facility.

We understand how to design play spaces that attract customers to your destination and keep them there longer.

With a range of products to choose from, our experts can help you design and create truly exceptional playgrounds that help you stand out from the competition and become the magnets for repeat business.

Play Fitness offers high-quality playgrounds, delivering complete projects and staying involved every step of the way.

We can offer solutions for all generation's so the whole family can stay occupied on our fun play solutions that stimulate their imagination and challenge them physically.

The equipment is low maintenance due to sturdy construction and simple design. It is made from high quality steel and powder coated to increase durability and protect from the elements.

WHY CHOOSE PLAY FITNESS?

Superior Quality Assurance

Because so much of our manufacturing is done in Britain, we have more control over the final production outcome. That's good for us, and good for you. There's more room for better solutions and assuring good quality. From designers to welders, we keep a watchful eye over the craft, quality and safety standards of everything we produce.

Galvanise

Our steel products are hot dip galvanised inside and outside and powder coated finish. The galvanisation has excellent corrosion resistance in outside environments and requires low maintenance.

Powder Coating Finish

We offer a six-stage pre-treatment process and a two-step coating process, including an epoxy primer for maximum corrosion protection, extending the life of the product by up to four times.

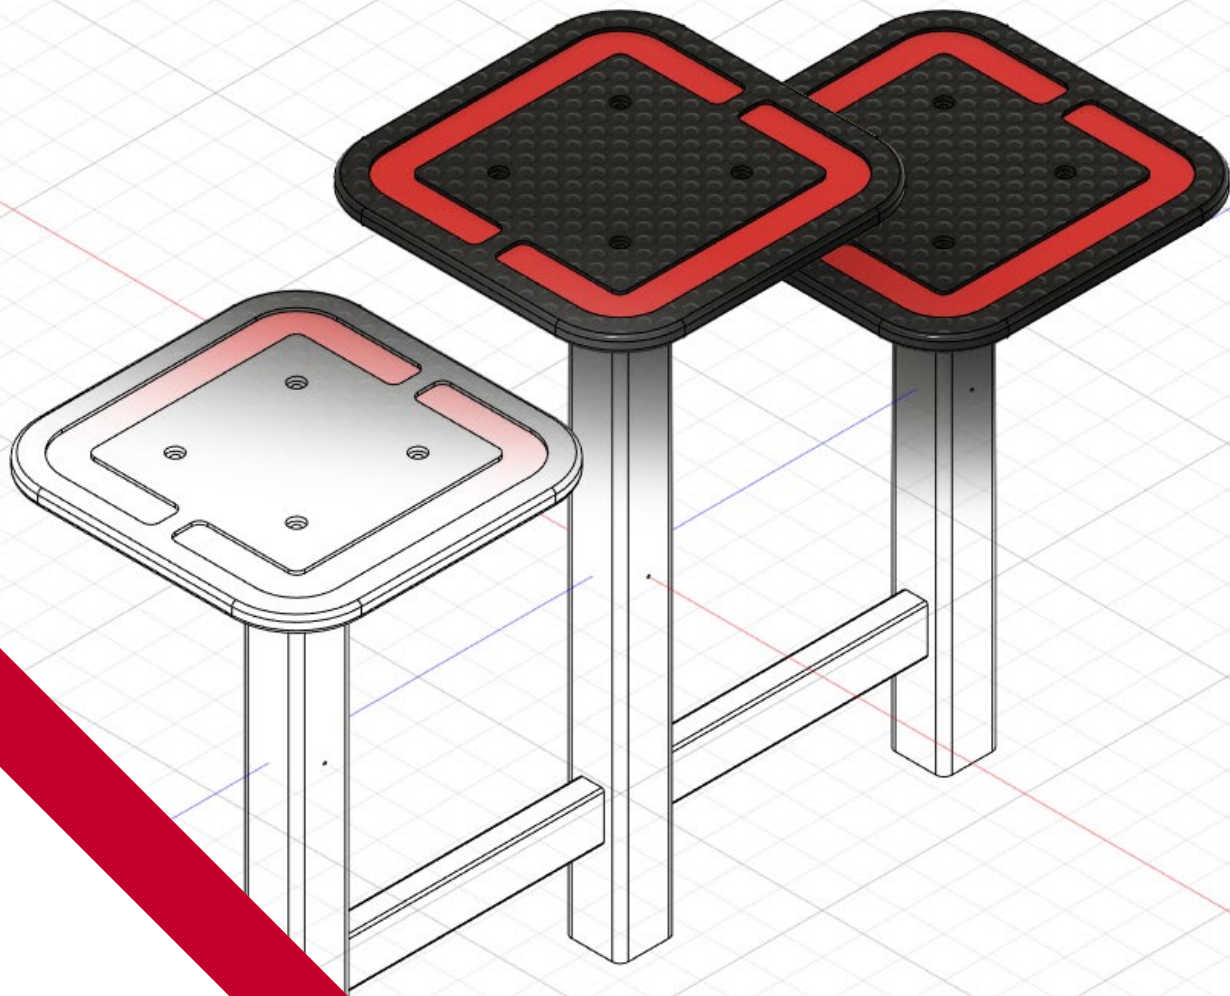

Elements

High Density Polyethylene (HDPE)

- The versatile properties of this material, including UV stability, make it resistant to fading, moisture, weather, stain and graffiti. The perfect choice for outdoor environments. Increasingly used across a wide range of industries and applications to replace timber and composite panel components. HDPE offers a softer, warmer and more play friendly feel to touch and it is 100% recyclable.

Densetec Grip - Has A heavy texture and tacky top surface. Often used for platforms, decking and tread surfaces where a walking or step surface is required.

Rubber Dampener - Some of our equipment uses a heavy duty rubber torsion spring system which controls the back and forth movement. The dampener works without any noise and requires low maintenance. The benefits of this component, includes weatherproof, long lasting, accident proof, and fully guided motion.

The open design means all children can use it safely and have equal access to benefit from this perennial favourite. Children of all abilities can play together on the Level Roundabout, where there are designated spaces for wheelchair users. Another adult or child can assist with movement and enjoy the experience thanks to the handles and large seat.

By its very nature, the roundabout promotes interaction as kids (and adults) work together to get it going and keep everyone having fun while developing strength, coordination, and balance. The need to manoeuvre the roundabout from the outside promotes cooperation and verbal

communication. As users work cooperatively to move the roundabout, they have an enjoyable opportunity to improve their communication and confidence.

No matter their skill level, kids can enjoy the ride securely thanks to built-in safety measures including an inherent speed limiter, slip-resistant textured platform, and integrated armrests for added support. Users with decreased mobility and wheelchairs may easily transition onto the platform thanks to its seamless base and slip-resistant surface.

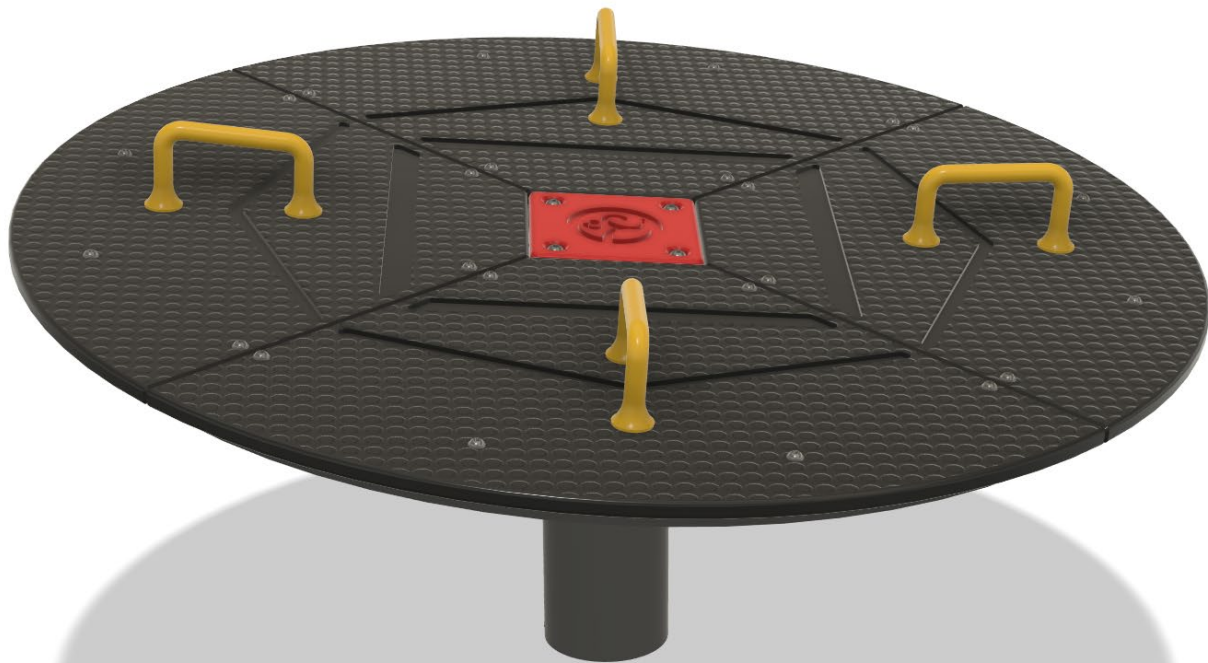

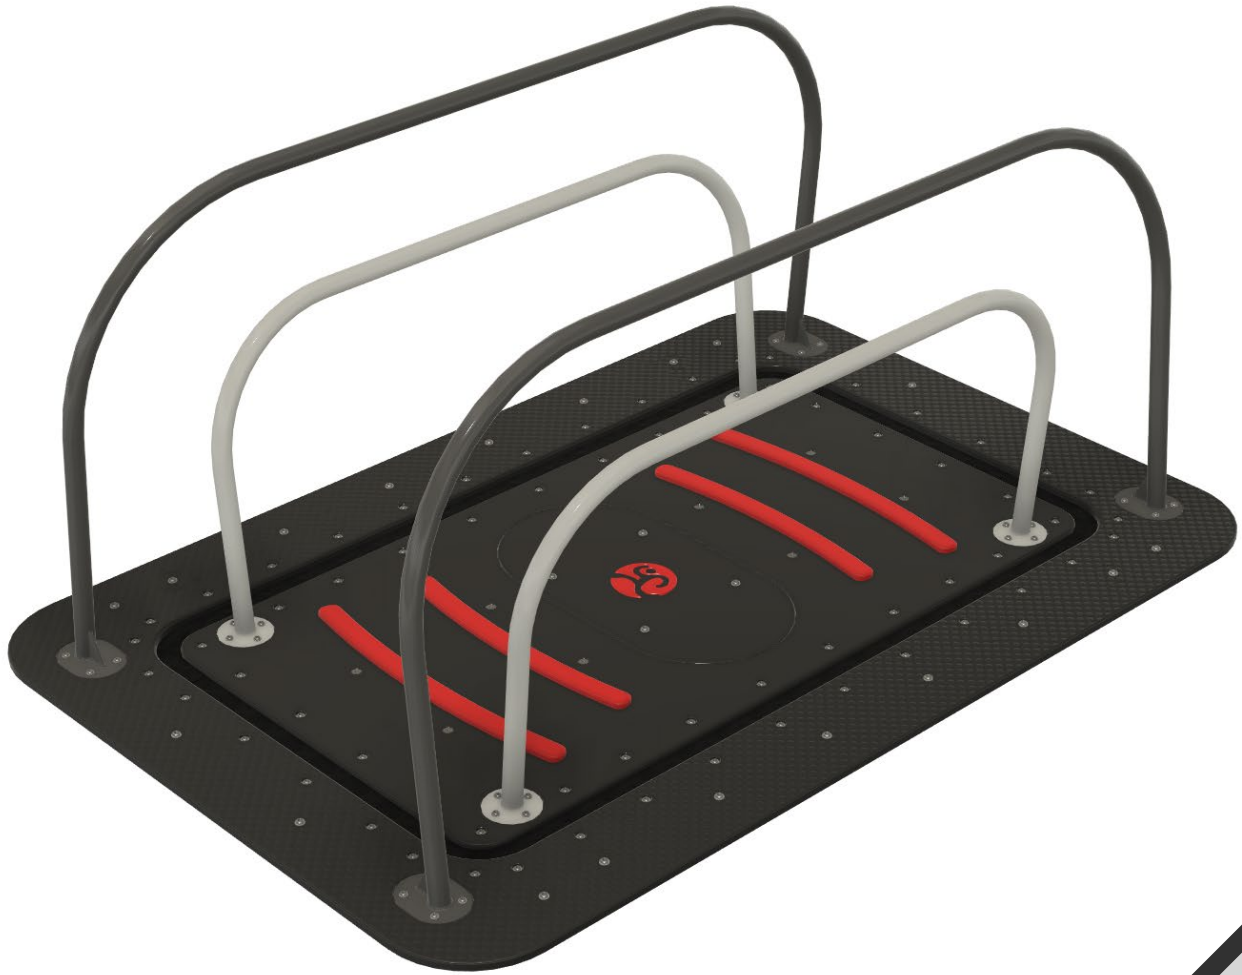

KALEIDOSCOPE SPINNER

Spinners can benefit children greatly since they provide a variety of physical and mental advantages. It encourages them to participate in physical activities like pushing, pulling, and running, which help them become more physically fit overall and develop their gross motor abilities.

Kids' vestibular sense, which helps keep the body balanced while moving, is stimulated by spinning as well. Better balance, cause-and-effect understanding, and depth perception are all aided by this.

Spinners on playgrounds also promote social interaction, emotional control, inclusion, and teamwork. They can assist kids in developing the idea of rotation and directionality, which is crucial for their cognitive growth.

ROCK-N-RUMBLE

The inclusive rocker allows a wheelchair user to experience all the benefits of rocking right from their chair. It helps promote relaxation while also providing some exercise, and the vestibular motion of the platform may help stimulate brain chemistry.

Rock-N-Rumble features easy entry/exit from the level platform. The red rumble strip is specifically designed to keep the wheelchair stationary while in use and gives tactile feedback to wheelchair users as they roll over them. Handles on both sides allow adults or children to assist with motion and enjoy the experience.

TIDAL SAIL

This toddler rocker helps improve balance, strength, and coordination while having a blast rocking. It can aid kids in understanding rotation and directionality, which is crucial for their cognitive growth. Additionally, rocking improve coordination and balance by enlarging the core.

HEX-ROCKER

Designed for bigger kids in mind with the sole purpose that more than one child can play on it. Cooperation is required to prolong the ride and play time. Even if all three kids don't stay on the platform for very long, its size enables up to three kids to play together at once.

FLOSWING

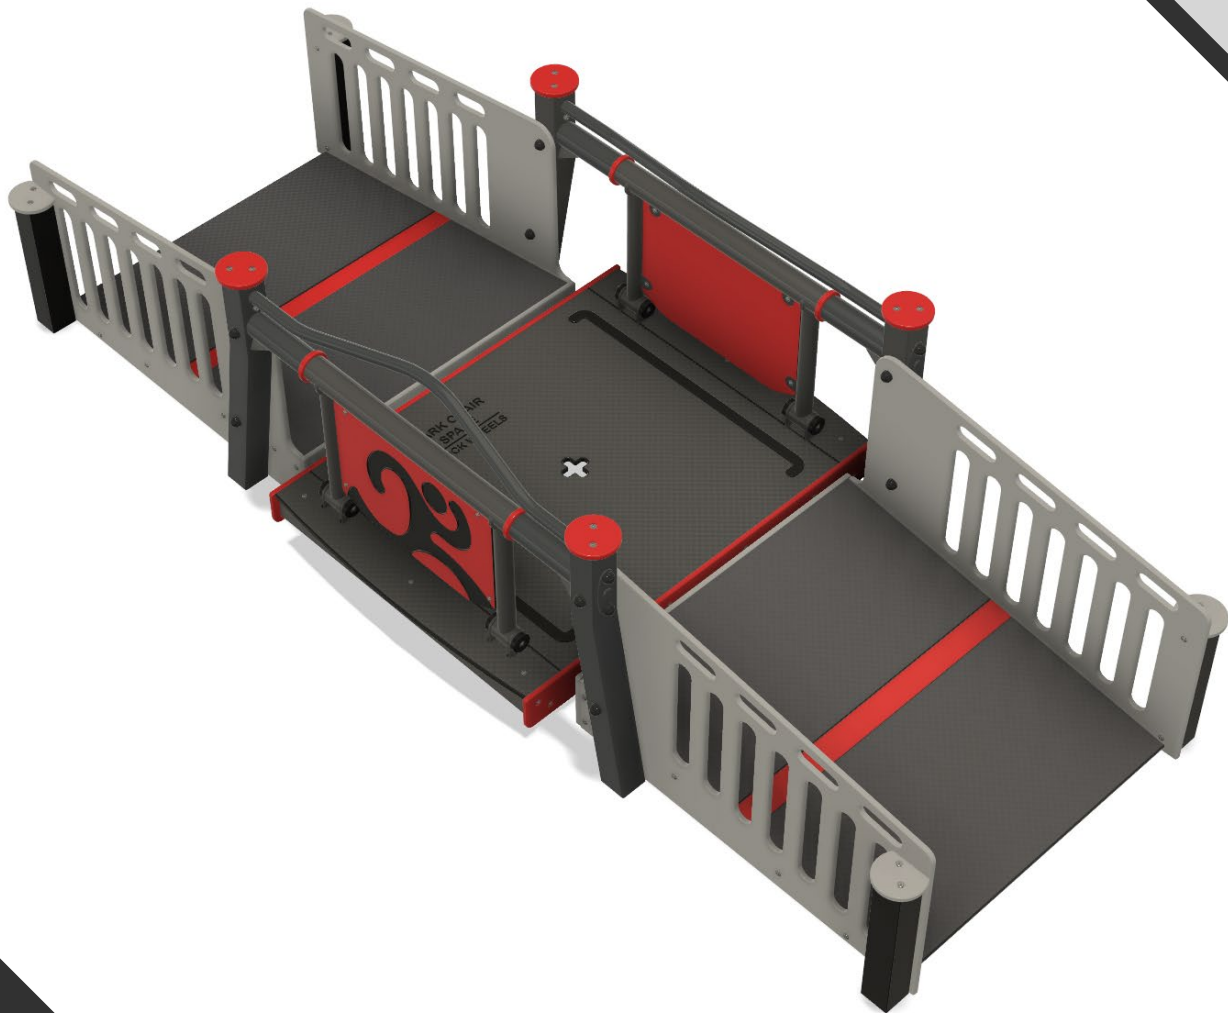

Children of all ages will love the FloSwing, which not only provides a fun experience, but also helps develop balance, coordination, communication and social skills.

Thanks to the side handle, it allows the user to gain momentum and maintain balance. Platform has ample of space for a wheelchair and steps on the outside allows for additional kids to join in on the fun.

The FloSwing uses a heavy duty rubber torsion spring system which controls the back and forth movement. The dampener works without any noise and requires low maintenance. The benefits of this component, includes weatherproof, long lasting, accident proof, and fully guided motion.

Thanks to FloSwing Bridge, moving from place to place in the play area is more fun, exciting and inclusive than ever before. Children of all ages will love the bridge, which not only provides a fun experience, but also helps develop balance, coordination, communication and social skills. FloSwing Bridge brings everyone together in the middle of the action, providing a truly universal play experience for kids of all abilities.

The FloSwing uses a heavy duty rubber torsion spring system which controls the back and forth movement. The dampener works without any noise and requires low maintenance. The benefits of this component, includes weatherproof, long lasting, accident proof, and fully guided motion.

AIRSURF

Enter the future of air surfing. Stand up and hold on to the round bar, and ride the waves. Designed for bigger kids, our AirSurf is a demanding and challenging activity. Children make use of good coordination and swinging back and forth on the deck for the ultimate thrill ride.

CLASSIC SWING

The classic swing A-Frame design is a great addition to any play area. Engineered for longevity and strength with even weight distribution and a presence that cannot be ignored. The frame height measures 2.5m with fully welded top beam for unbeatable strength and durability. Your choice of seats available from standard seat to nest basket.

CLASSIC COMBI-SWING

The Classic Combi-Swing can be configured to adapt to individual needs & demands. Perfect for mid to large play areas. Engineered for longevity and strength with even weight distribution and a presence that cannot be ignored. The frame height measures 2.5m with fully welded top beam for unbeatable strength and durability. Your choice of seats available from standard seat to nest basket.

MINI FLOWER SWING

The child's body is gently supported by the soft flexible rubber seat while it swings briefly. 1-4 year olds now have the chance to swing independently without adult supervision. Kids can position themselves seated, sitting on the knees or on the stomach.

WACKY TREEHOUSE

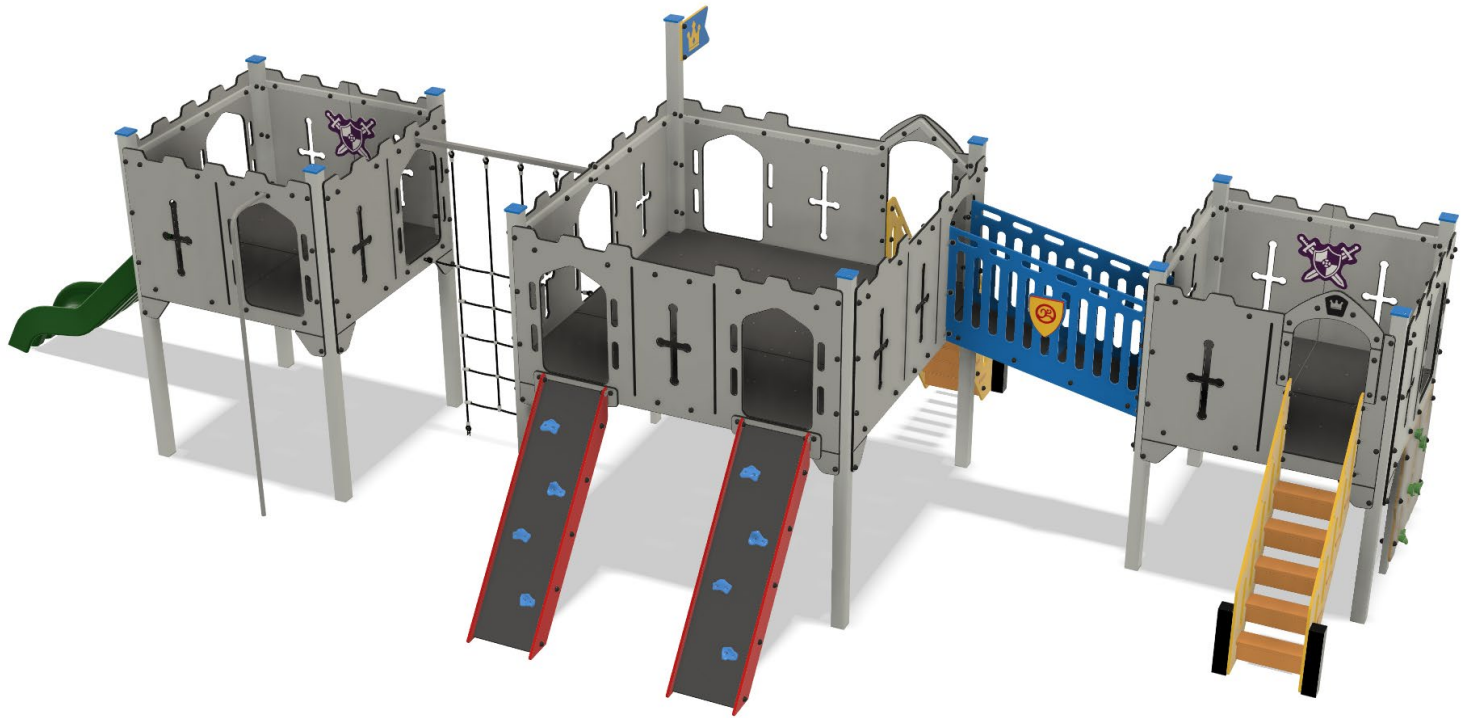

Play Fitness Wacky Treehouse inspires and attracts play with its bold colours, funky shapes. Our play unit are multifunctional and can accommodate many children playing at once, serving as a central attraction point in any play area. Designed to offers many levels of fun attractions and roomy decks.

The play unit consists of:

- » 1.2 and 1.5 Metre Slides
- » 1.5 Metre Fireman's Pole
- » 1.5 Metre Stairs
- » Sloping bridge
- » Net Bridge
- » Net Ladder
- » Two Ramp Climbing Wall
- » Rock Climbing Wall

Can be configured to adapt to individual needs and requirement.

Play Fitness Royal Fortress structure provides lots of play challenges and encourages a variety of movement, promoting physical development and overall well-being. With its mega decks, children will have ample of space and fun exploring.

The play unit consists of:

- » 1.5 Metre Slides
- » 1.5 Metre Fireman's Pole
- » 1.2 and 1.5 Metre Stairs
- » Sloping bridge
- » Net Bridge
- » Two Ramp Climbing Wall
- » Rock Climbing Wall

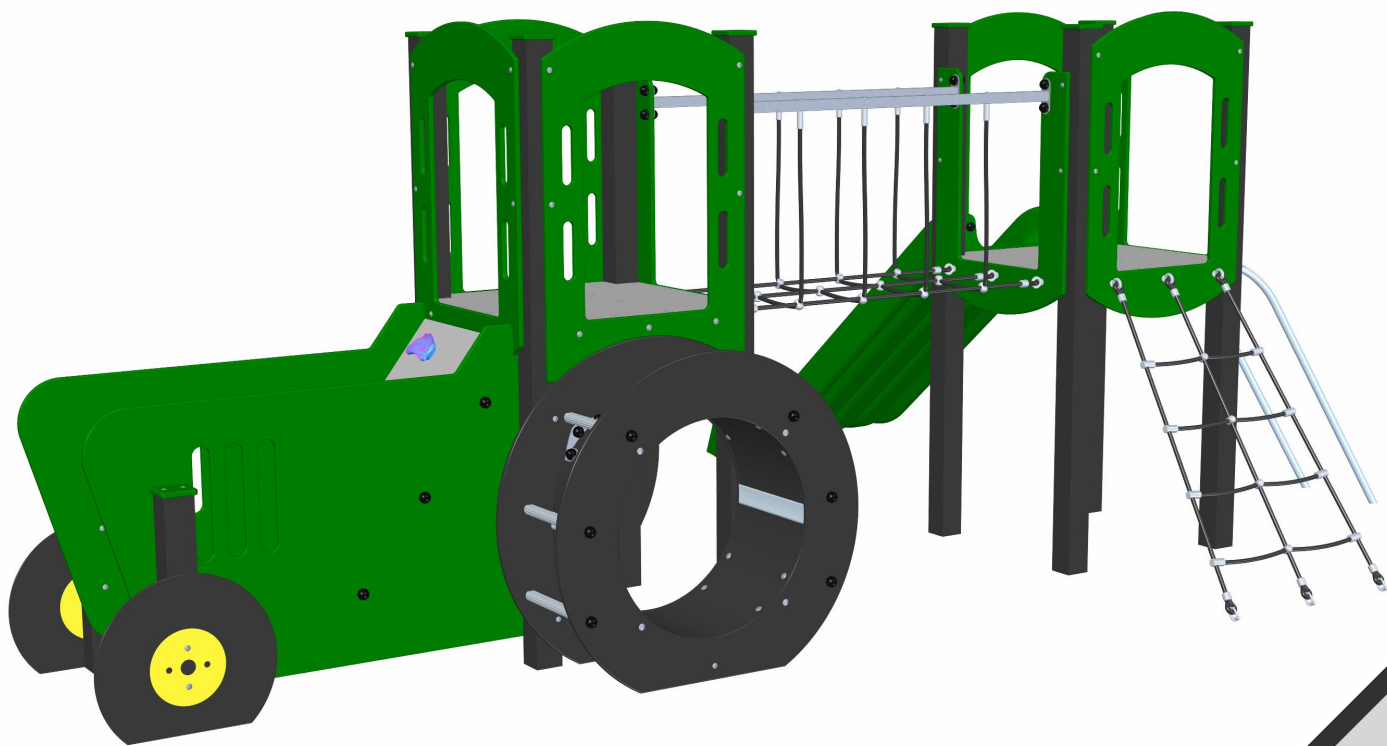

Can be configured to adapt to individual needs and requirement.

MULTI-PLAY DOUBLE TOWER

This Multi-Play Double Tower unit provides space for children to play while engaging them in cooperative activities and gross motor skill development. Reminiscent of the wide stripes of the Big Top tent, this Capital Circus-style unit brings all the fun of the fair to the local playground.

Fast moving action in a compact, exciting play unit where kids can really try their fitness levels and stamina.

TRACTOR

Tractor play unit is an exciting attraction for dramatic and physical play for young children. The rich variety of climbing, crawling and sliding activities engages and ensures physical activity that trains key motor skills and core muscles. In the case of Tractors, narrative themes of farming, driving and construction come into play.

TODDLER COMPERVAN

Let your children's imagination run free with this lifelike campervan. With a good size deck space to cater for group play. This small but action-packed unit is great for any playground setting, especially for caravan site and pre-schools.

The play unit has a built-in small kitchen play area, back bench and front driver seat with a steering wheel. There's also space at the rear for kids to climb through or can access the campervan via the side opening.

Little Explorer design to encourage children stay for a long time, and return over and over again. This steel play unit contains 7 play features that provide children with a variety of gradual physical challenges and opportunities for social interaction and areas that are more crucial as they grow in social competence.

The play unit consists of:

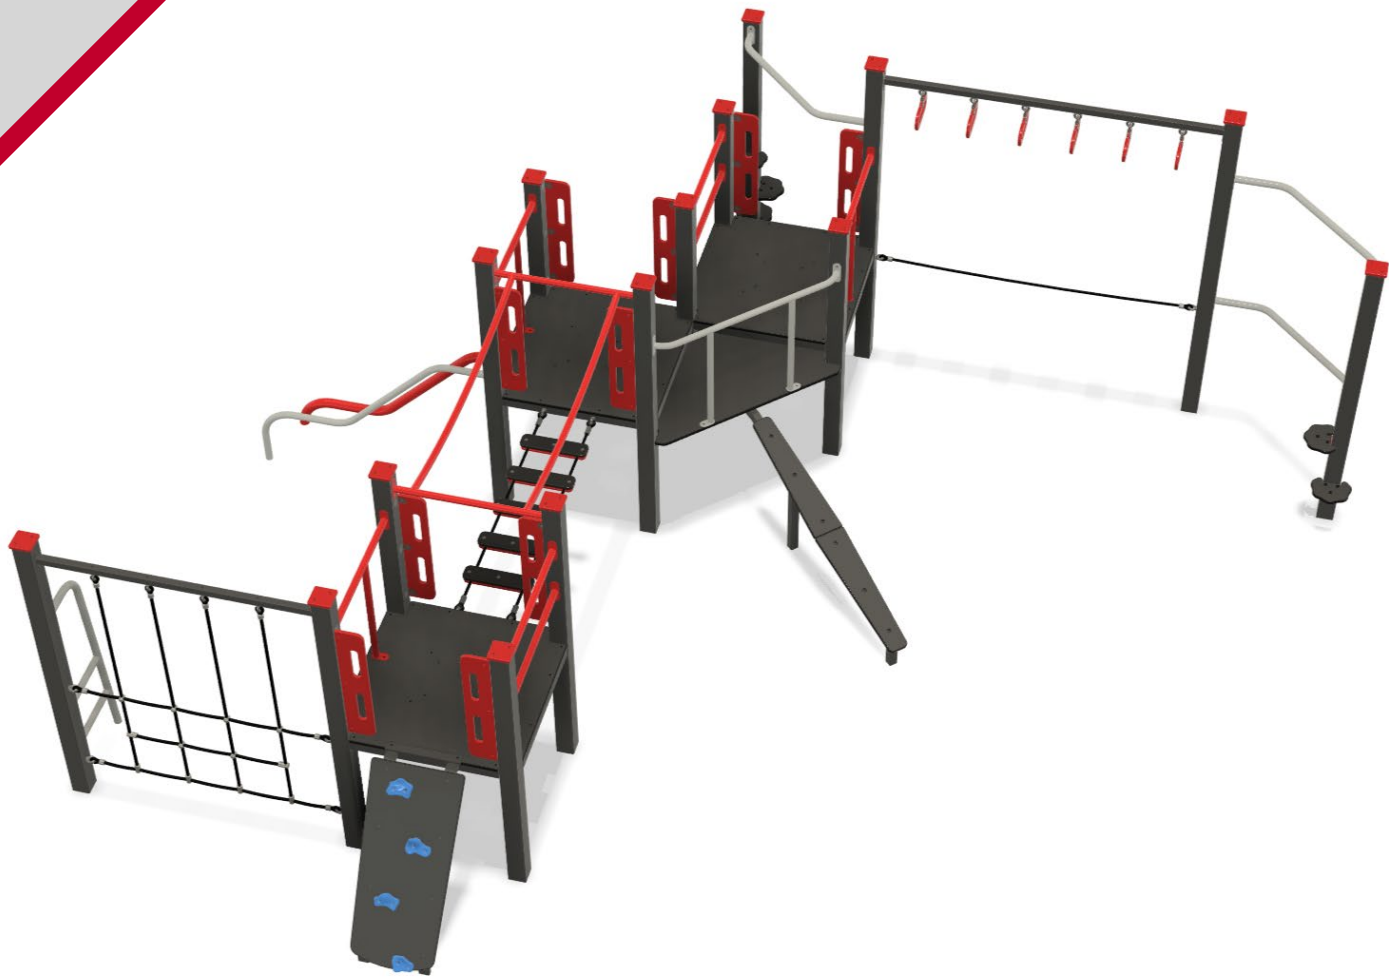

- » Stepping Stones
- » Angle Crossing Bars
- » Climbing Net
- » Gravity Jump Bar
- » Suspended Deck with 4 way Scramble Net
- » Ladder
- » Slide Bars
- » 2 Platforms (900mm Height)

LITTLE EXPLORER N2

With a total of 11 play features, this steel play unit offers a variety of gradually growing physical challenges and opportunities for social interaction, both of which are crucial for children as they advance in their social abilities.

The play unit consists of:

- » Stepping Stones
- » Angle Crossing Bars
- » Monkey Grip Plastic Handles
- » Gravity Jump Bar
- » 2 Ladders
- » Slide Bars
- » Sloping Balance Beam
- » Ladder Bridge
- » Ramp Rock Grip Climbing Wall
- » Climbing Net
- » 3 Platforms (900mm Height)
- » Half Size Platform (750mm Height)

No exercise area is complete without the right type of flooring.
We specialise in the following types:

- » **Artificial Grass**
- » **Wet Pour**
- » **Wet Pour Tiles**
- » **Rubber Matting**

Your flooring choice will be determined by preference, critical fall height and existing flooring surface.

Artificial grass brings the look of nature to your environment, it has become increasingly popular and is widely used throughout both the domestic and education sectors, as it is durable so can withstand area of heavy usage, which is great for our exercise areas as they do have a large foot drive.

It offers a permeable drainage system, which means in wet conditions it will not have any slippery or muddy areas. It can generate savings as there are no up-keeping costs and is particularly useful if maintenance isn't practical in the particular area.

As you are not applying fertilisers or pesticides it is friendly to the environment. Also, as it would not require watering so would not be affected if there was a hose pipe ban, therefore saves on water.

SERVICE AND WARRANTY

Service

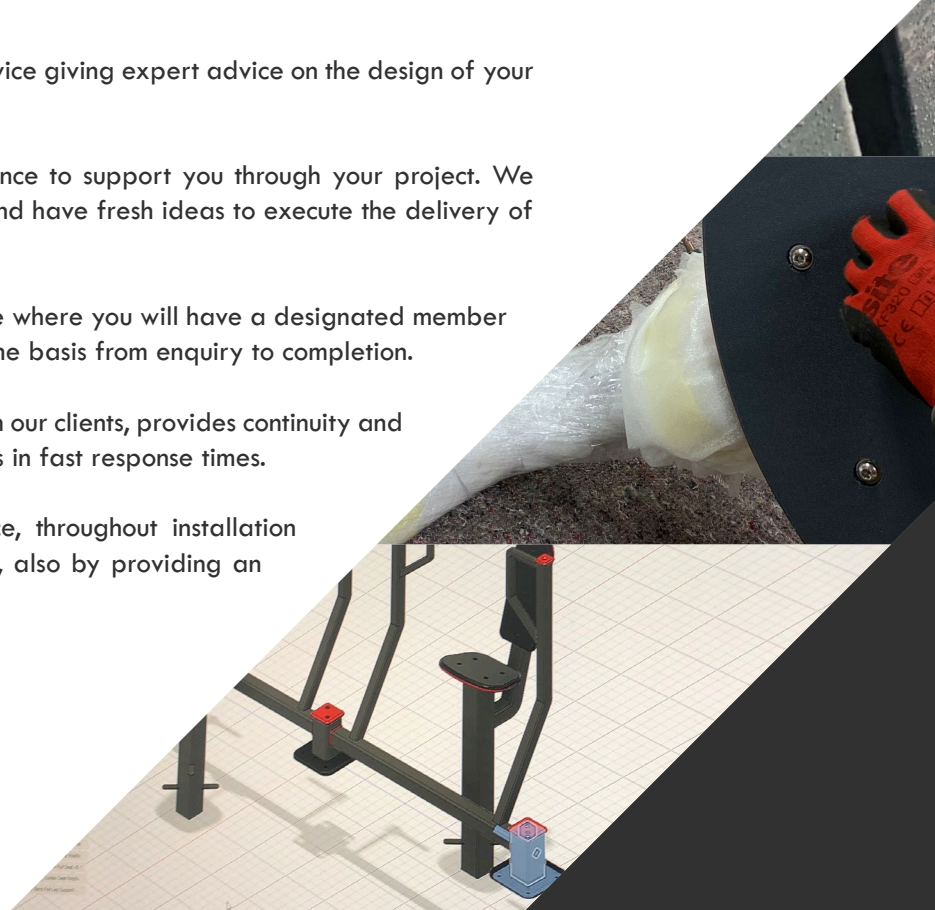

Play Fitness provides a free consultation service giving expert advice on the design of your outdoor equipment.

We will share our knowledge and experience to support you through your project. We offer free advice on funding your project and have fresh ideas to execute the delivery of superb facilities.

You will receive our renowned customer care where you will have a designated member of our team dealing with you on a one to one basis from enquiry to completion.

This helps us to build strong relationships with our clients, provides continuity and helps us to deliver our products and services in fast response times.

We will endeavour to continue this service, throughout installation by our experienced DBS checked installers, also by providing an excellent customer aftercare.

Warranty coverage

This warranty applies to Play Fitness' products for the time periods described for each product type above and with the limitations described in this warranty.

This warranty covers only defects in materials. Play Fitness' liability under this warranty is limited to repair or replacement of defective products, without charge, at Play Fitness' discretion.

The warranty applies only if products have been properly installed and maintained

The warranty only applies if Play Fitness' products have been installed according to the instructions provided by Play Fitness, and maintained correctly according to the Play Fitness maintenance guide.

No coverage for accidents, wear, tear, cosmetic issues, misuse or vandalism

This warranty does not cover any damage caused by accident, improper care, negligence, normal wear and tear, surface corrosion on metal parts, discoloured surfaces and other cosmetic issues or failures due to misuse or vandalism.

Products installed near water

Standard products installed in coastal areas, within 200 metres from the shore, will only be covered by the warranty for half the period of the standard product warranty in relation to defects caused by corrosion. Play Fitness' warranty, if applicable, is limited to a 5-year warranty in relation to such products.
